

Kevin Bhavsar

Senior Full Stack Developer | .NET Core | Microservices & Cloud

KevinBhavsar.MCA@gmail.com | +91 97251 41303 | [LinkedIn](#)

Summary

- Results-driven **Senior Full Stack Developer** with **19+ years** of experience in Microsoft Technologies.
 - Strong expertise in designing and developing **RESTful APIs, microservices-based event-driven architectures**.
 - Proficient in delivering high-performance systems with a focus on **scalability, clean architecture, and SOLID principles**, along with strong experience in **SQL Server optimization and backend engineering**.
 - Experienced in **Agile development and end-to-end SDLC**, with a track record of contributing to **architecture decisions, code quality, and technical mentoring**.
 - Passionate about building modern applications and integrating **AI-enabled features and intelligent services**.
 - Currently working as a Senior Software Engineer at EPAM Systems India Pvt Ltd.
-

Core Competencies

- **Development:** C#.NET, VB.NET, ASP.NET Core, ASP.NET MVC, RESTful API, WPF, Angular, TypeScript, jQuery, HTML5, CSS3
 - **Architecture & Design:** OOP, SOLID Principles, Design Patterns, Microservices Architecture, Event-Driven Architecture (Messaging / Queue-based systems)
 - **Databases:** SQL Server, MySQL, Query Optimization & Performance Tuning
 - **Cloud & DevOps:** AWS, Azure (Fundamentals), Docker & Containerization, CI/CD Pipelines (GitHub Actions, Jenkins)
 - **Tools & Practices:** Git, Agile (Scrum), Code Reviews, Logging, Exception Handling, Unit Testing & Debugging
 - **AI Skills:** LLM-Models, OpenAI/Azure OpenAI Integration, Prompt Engineering Techniques, Context Management
-

Project Experience

Desire2Learn - Learning Management System

Technologies: ASP.NET Core (C#), Node.js, Entity Framework Core, SQL Server, AWS, DynamoDB, GitHub Actions, Microservices architecture

Description: A cloud-based learning management system (LMS) that enables educational

institutions and businesses to deliver large-scale training and education content.

Role & Responsibilities:

- Collaborated with **cross-functional teams** for requirement analysis, solution design, technical discussions, client demos, and roadmap planning.
- Documented and published **client engagement activities**, including weekly/monthly **status updates**, insights, and follow-ups.
- Maintained comprehensive **technical documentation** for all new features, configurations, coding standards, checklist for new joiner on-boarding, code review standards and release documents.
- Conducted peer **code reviews** and provided technical **mentorship** to junior developers, ensuring adherence to **coding standards** and **best practices**.
- Worked on EDDS (Event-Driven Database Migration) project, cutting redundant database copies using C#.NET, RESTful APIs and AWS.
- Implemented a **C#.NET-based code generation utility**, reducing development time by **50%**.

Cloud HR

Technologies: Angular, C#.NET, ASP.NET MVC, VB6, jQuery, JavaScript, Entity Framework Core, SQL Server, RESTful APIs, Redis, AWS, Jenkins, GitHub Actions

Description: A comprehensive HR management system that enables organizations to manage employee data, payroll, leave tracking, and performance evaluations.

Role & Responsibilities:

- Migrated legacy VB6 application into a modern Angular (TypeScript) + ASP.NET Core based cloud application, designing scalable RESTful APIs and microservices deployed on AWS.
- Developed and consumed RESTful APIs for seamless frontend-backend communication.
- Improved performance and scalability of applications through **optimized architecture and database tuning**.
- Implemented **CI/CD pipelines using GitHub Actions/Jenkins** for automated deployments.
- Implementation of standard processes and toolchain like JIRA dashboards, Git branching workflows and source code version control
- Designed and integrated **AI-powered chatbot (Amazon Lex)** to automate HR workflows, demonstrating experience with **AI-enabled applications and intelligent service integration**.
- **Support ticket triaging** and collaborated with **Cloud-Ops & Customer Support teams**.

IndraCareLab

Technologies: ASP.NET MVC, C#.NET, WPF, Silverlight, RIA Services, MVVM, HTML5, CSS3, Bootstrap, HL7, Jenkins

Description: A cloud-based healthcare solution for diagnostic labs, managing patient data,

specimen tracking, and lab information systems.

Role & Responsibilities:

- Designed and implemented **MVVM architecture** for modular development.
 - Led **UI development for real-time asset tracking** using **WPF & LINQ**.
 - Implemented **ASP.NET MVC T4 scaffolding**, reducing development time by **70%**.
 - Migrated Silverlight based application into latest web-based application using ASP.NET MVC.
-

Professional Experience

EPAM Systems India Private Limited *(July 2022 – Present)*

Senior Software Engineer, Lead Software Engineer

One Advanced *(August 2016 – June 2022)*

Senior Specialist Software Engineer

Indralok Technologies Pvt Ltd *(October 2008 – July 2016)*

Senior Software Engineer

Impulsive SoftSolutions Pvt Ltd *(May 2007 – September 2008)*

Software Developer

Proses Web Technologies Pvt Ltd *(June 2006 – April 2007)*

Software Developer

Education

- **Master of Computer Applications (MCA)**, Sardar Patel University *(2003 – 2006)*
 - **Bachelor of Science (B.Sc.) in Computer Science**, South Gujarat University *(2000 – 2003)*
 - **HSC in Science Stream**, GSEB Board *(1998 – 2000)*
 - **SSC**, GSEB Board *(1997)*
-

Personal Details

- **Date of Birth:** June 12, 1983
-

Yours sincerely,

Kevin Bhavsar
